

Managed **ITDR**

Identity Threat Detection and Response

A PURPOSE-BUILT SOLUTION FOR CONTINUOUS THREAT PROTECTION AGAINST CRITICAL RISKS LIKE ACCOUNT TAKEOVERS AND BUSINESS EMAIL COMPROMISE (BEC)

Unwanted Access

(Credential + Token Theft Detection)
Stops suspicious logins before damage

Shadow Workflow Detection

(Malicious Inbox Rules/Forwarding)
Exposes hidden mail-flow manipulations

Managed Identity Isolation

(24/7 SOC Containment)
Automatically contains compromised M365 identities

Identity Security Assessment Report

Shareable snapshot of identity risks

Rogue Application Defense

(Traitorware + Stealthware)
Finds and reduces OAuth app persistence

Unwanted Access Rules

(Expected vs Unauthorized Locations/VPNs)
Auto-alerts and disables risky sign-ins

Impossible Travel & Risky Sign-In Detection

Flags logins that defy physics

Incident Reporting & Guidance

Clear alerts with human-led remediation

Currently Supported Platforms:  Microsoft 365
